

Ectoine

Code No.: **BIA-E2230**

Pack sizes: **5 mg, 25 mg**

Synonyms : NSC 614616, Pyrostatin B, Pyrostatine B, (4S)-2-Methyl-3,4,5,6-tetrahydropyrimidine-4-carboxylic acid

Specifications

CAS # : **96702-03-3**
Molecular Formula : **C₆H₁₀N₂O₂**
Molecular Weight : **142.16**
Source : ***Brevibacterium linens***
Appearance : **White solid**
Purity : **>95% by HPLC**
Long Term Storage : **-20°C**
Solubility : **Soluble in methanol or DMSO**

Application Notes

Ectoine is a cyclic amino acid isolated from halophototrophic bacteria of the genus Ectothiorhodospira. Ectoine is a zwitterion which can act as a substrate of the E. coli transporter ProP. Ectoine is cytoprotective, reducing claudin 2 expression in inflammatory bowel disease and inhibiting loss of ZO-1 and occludin and preventing IFN- γ /TNF- α -induced paracellular flux of 4 kDa FITC-dextran in vitro. Ectoine reduces expression of pro-inflammatory cytokines and oxidative stress during colitis.
