

Oxychloroaphine

Code No.: BIA-O1527

Pack sizes.: 1mg, 5mg

Synonyms:

Oxychloraphin, Phenazine-1-carboxamide, Xanthoraphine

Specifications

CAS #	: 550-89-0
Molecular Formula	: C13H9N3O
Molecular Weight	: 223.2
Source	: -
Appearance	: Yellow solid
Purity	: >98% by HPLC
Long Term Storage	: -20°C
Solubility	: Soluble in ethanol, methanol, DMF or DMSO. Poor water solubility.

Application Notes

Oxychloroaphine (1-phenazinecarboxamide) is a simple phenazine produced by several species of *Pseudomonas*. Oxychloroaphine is a weakly active antifungal metabolite that plays a role in the biocontrol of plant diseases by several *Pseudomonas* strains. Oxychloroaphine and related phenazines are important dereplication standards in discovery research to eliminate leads due to high amounts of weakly potent actives.
