

Setomimycin

Code No.: BIA-S1611

Pack sizes.: 1mg, 5mg

Synonyms:

-

Specifications

CAS #	: 69431-87-4
Molecular Formula	: C34H28O9
Molecular Weight	: 580.6
Source	: -
Appearance	: Orange solid
Purity	: >95% by HPLC
Long Term Storage	: -20°C
Solubility	: Soluble in ethanol, methanol, DMF or DMSO.

Application Notes

Setomimycin is a rare 9,9'-bianthryl antibiotic first isolated from a strain of *Streptomyces pseudovenezuelae* by Omura and colleagues at the Kitasato Institute, Japan, in 1978. Setomimycin is active against Gram positive bacteria, including mycobacteria, and has antitumor activity both in vitro and in vivo. Limited access has restricted further research on this metabolite.
